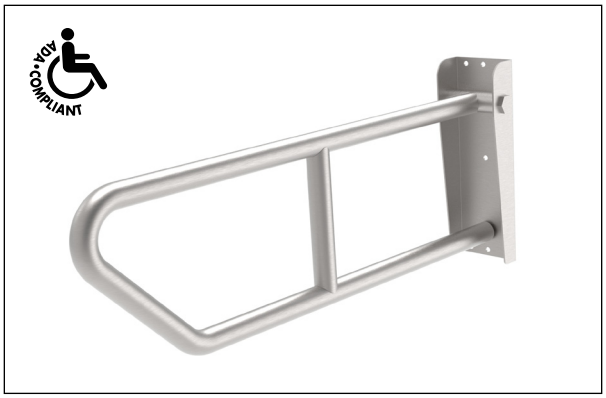
8370-107

Swing-Up Grab Bar

1¼" O.D. Heavy-Duty Stainless Steel Swing-Up Grab Bar

◯ Standard Model 8370-107 **BradEX®**



Product Materials

TUBING: 1¼" O.D. 18 gauge stainless steel, seamless construction with exposed surfaces in architectural satin finish. All welds ground and polished to blend. Mandrel bending process maintains uniform bar diameter.

WALL PLATE: 12 gauge stainless steel with exposed surfaces in architectural satin finish. Concealed mechanism holds bar up and out of the way.

Strength

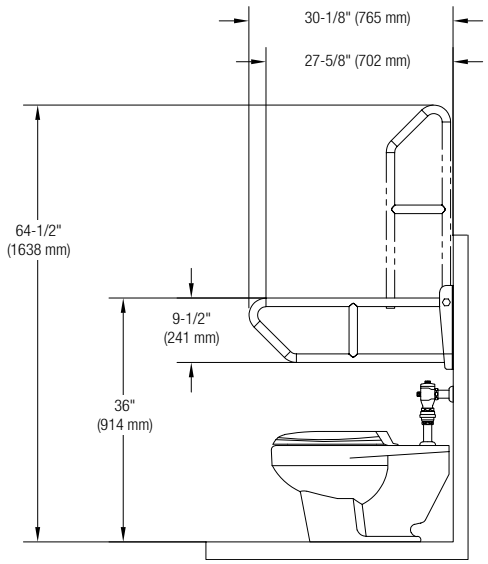
When properly mounted, all Bradley heavy-duty grab bar systems meet or exceed the requirements of ANSI Standard A117.1, the ADA and ABA Accessibility Guidelines for Buildings and Facilities (ADAAG), and the Uniform Federal Accessibility Standard (UFAS). Meets CT code 1109.2.4. Grab bar has been tested to support a vertical force of up to 250 pounds. Wall must be reinforced in the area of the grab bar in order to support the load it is intended to support.

Operation

Grab bar is manually lowered to horizontal support position and raised for departure. Bar is designed to prevent it from accidentally falling into position. Bar operates with less than 5 pounds of force.

Installation

Verify all rough-in dimensions prior to installation. Secure to wall where adequate in-wall backing exists. Use bar as template to locate mounting holes. Drill holes and set anchors as appropriate. Mount grab bar and secure mounting screws. (For Bradley grab bar mounting kits, visit bradleycorp.com.) Mark point of contact with wall when bar is in raised position.



Optional Features

Features		Suffix
◯	Peened Finish **BradEX®**	-2

Guide Specification

Swing-up grab bar shall be stainless steel with exposed surfaces in architectural satin finish. Install with Bradley Mounting Kits as indicated. Only available in size indicated on drawing.

ADA Compliant

- ☑ Complies with ADA Standards for Grab Bars (609.2, 609.4, 609.8) and Operable Parts (309.4).
- ☑ Consult local and national accessibility codes for proper installation guidelines.
- ☑ Conformity and compliance to local and national codes is the responsibility of the installer.
