Frames

Constructed of 1/2" thick High Density Polyethylene (HDPE) with homogeneous color and a matte finish texture. Dirt or graffiti are easily removed with standard industrial cleaners. Frames are welded to cubby box to provide a secure, rigid assembly. Frame width is 1 7/8" on each side. Frame divider height is 1".

Sides, Tops, Bottoms and Dividers

Constructed of 3/8" thick white HDPE with a smooth finish. Sides and back of box are formed from a single sheet of HDPE with fused corners. Tops, bottoms and dividers are welded to box to form a complete unit without metal fasteners or dovetail joints.

Construction - Optional Features

Slope Top – Model LENOXSLOPETOP

Constructed of a 1" thick HDPE backplate (color may vary) and a 1/2" thick colored HDPE slope top panel. Provides a finished look and prevents accumulation of dust and storage of items on top of cubby lockers. Back plate secures to wall first, then panel is secured through the cubby locker top from the inside — no exposed fasteners. Standard slope is 10°. Available in single cubby locker size or in 24", 30", 36", 45" and 72" lengths. All necessary hardware included.

* Normal use further defined as lockers installed in a climate-controlled environment, away from direct sunlight.

Wood bases are not recommended.

Flat Top – Model LENOXFLATTOP

Constructed of 3/8" or 1/2" thick HDPE with homogeneous color and a matte finish texture. Provides a finished look on top of cubbies. Available in single cubby size or in 24", 30", 36", 45" and 72" lengths. Hardware not included.

Base – Model LENOXBASE

Constructed of 1" thick HDPE with homogeneous color and a matte finish texture. Base can be 3" or 4" tall and set back 3" from cubby locker front to provide toe clearance. Notched end caps provide ease of installation. Installation hardware, including screws, anchors, L-brackets and mending plates are included.

End Panels – Model LENOXENDPANEL

Constructed of 3/8" thick HDPE with homogeneous color and a matte finish texture. End panels cover white cubby sides on exposed ends and are available in flat or slope top styles and in single or double (back-to-back) configurations. When properly installed, the top edge of the end panel is exposed, sitting flush with the finished locker top. All necessary hardware included.

Fillers – Model LENOXFILLER

Constructed of 1/2" thick HDPE secured to 3/8" thick HDPE angle bracket. Filler is attached through the inside of an end or corner cubby to fill gaps between cubbies and a wall or another cubby in a corner. Available in colors to match cubbies 24", 36", 48", 60" or 72" tall, and 3", 6", 12", 15" and 18" wide. All necessary hardware included.

Coat Hook

Double hook constructed of black polycarbonate. Furnished in 60" and 72" two-tier cubbies only. Hook hangs under cubby tops. Secured to tops with stainless steel screws.

Wall Hook

Constructed of black powder-coated cast zinc. 1-3 hooks can be secured to each tier with this option. Please specify location.
